

Why you need to move to cloud payroll software

myob

Maximise efficiency, minimise risk

Managing payroll may seem like a lot of tedious manual work – and let's face it, it can be – but getting it wrong can have some major consequences. You risk getting fined by the tax department, creating even more work and, perhaps most importantly, paying your people late or incorrectly. That's why more and more businesses are moving their payroll processes to cloud software like MYOB Advanced People. It makes it easy to get everything filed on time and accurately, so you stay compliant and keep your people and the tax department happy.

So how does it work? Here we share why it's time to move your payroll to the cloud, right now.

1 Automate and streamline workflows

Connecting a cloud ERP like MYOB Advanced with a payroll system like Advanced People can help make everything fast, simple and error free. It automatically pulls information into the right places, making it easy to find while reducing manual entry and the errors that go with it. It can also automate many of the workflows that used to take hours.

2 Simplify compliance

Successful payroll management requires staying up to date with ever-changing government legislation around recordkeeping, reporting and deadlines, along with those set down by the company around management reports, additional entitlements or overtime.

A cloud payroll system like MYOB Advanced People makes this easy. Settings and alerts can guide the manager, while hard limits built into the system can almost entirely eliminate risk – for example, a report can be locked after a deadline has passed.

3 Have complete visibility and transparency for reporting

In payroll, timely reporting isn't just a nice-to-have – it's a critical part of helping the company avoid risk and unnecessary outlay. Good payroll management will get accurate reports to management, auditors or the government on time every time – something that MYOB Advanced People makes simple. Enhanced payroll reporting, transaction history and audit tracking are available almost at the touch of a button.

4 Reduce errors and risk with streamlined payroll processing

Being accurate doesn't mean perfection – it means having processes to keep mistakes to a minimum. With MYOB Advanced People your payroll data is in the cloud and automatically updated, so you know factors like hours worked, current pay rate, leave entitlement and other employer obligations are correct and up to date.

5 Let employees self-service

Gathering all of the detailed information required for a pay run can be an incredibly time consuming process. MYOB Advanced People includes employee self-service functionality, where employees are able to apply for leave or update their personal details. Managers can use the same function to approve those leave requests. These are automatically incorporated into the appropriate pay run, while any issues are flagged.

6 Scale-up and down

If you're growing fast – or have big seasonal ups and downs – MYOB Advanced People makes it easy to scale as needed. By streamlining payroll tasks, hiring more employees won't significantly add to the workload. And since it's cloud software, MYOB Advanced People always delivers the same speed and reliability.

7 Access payroll anywhere, anytime

MYOB Advanced People is a cloud solution so working from home is a breeze. Access your payroll information in real time using any web browser. Staff working in different departments and locations can also access the same information, which improves collaboration and decreases the chance of misunderstandings.

Streamline payroll management in the cloud

Excellent cloud software like MYOB Advanced People can ensure payroll and reporting are accurate and on time, set hard limits and prompts to keep your company compliant, and make it easy for employees to manage their data. As a bonus, it also significantly reduces the time your team spends on payroll, by automating many of the most time-consuming workflows.

If you're ready to learn more about how a move to the cloud with MYOB Advanced People could streamline your processes, protect against risk and save you money, its time to get in touch.
